

# Tupperware Text Message Service Available

Imagine receiving a text to learn your monthly sales, both team and personal, or to inquire about parts for Tupperware® products. Now you can thanks to a new Tupperware tool!

Use the service, which is available in English, French and Spanish, and send a text to update Party Line Up statistics, retrieve current sales data and look up Mold information using your phone's data service. Features currently available:

## **Mold**

Use the keyword "Mold" to retrieve information based on the product mold number.

## **Sales**

Use the keyword "Sales" to receive information about your current month-to-date sales. The information includes your Personal Retail Sales, Team Retail Sales, # of Personal Recruits, Personal Qualified Recruits and more.

## **Party**

Use the keyword "Party" to update your party lineup information. Note: This option is not cumulative and does not add the new number to an earlier total.

## **Email**

Add the keyword "EMAIL" to the end of any request to have the response sent to you through email instead of text message.

Ready to try it out? First, you need to subscribe to use the Tupperware text service.
