

Tupperware[®]

Preserving your future[™]

For more than 60 years, Tupperware has offered innovative, high-quality, beautifully designed products that provide smart, stylish solutions for eating healthy, saving money and organizing the home. Now more relevant than ever, Tupperware[®] products also help support today's sustainable lifestyles by providing eco-friendly products that last a lifetime—minimizing waste and preserving our future.

Below are ten key environmental challenges and their sustainable Tupperware solutions.

Environmental Challenge

Sustainable Tupperware Solution

Reduce the consumption of disposable water bottles that end up in landfills.

Keep water close at hand with **Eco Water Bottles** and our **Fast Quench Tumblers**.

Added Benefit: Eliminate the cost, time and space needed to purchase and store bottled water. Instead, fill Tupperware[®] Bottles and Tumblers with tap water, affix their liquid-tight seals and chill in the refrigerator.

Reduce energy consumption while preparing and reheating meals.

Create healthy meals and snacks in minutes with the **SmartSteamer** and **TupperWave[®] Stack Cooker**.

Added Benefit: Save time and money by cooking in the microwave instead of the conventional oven.

Process food quickly and easily using the **Quick Chef[™] Pro**.

Added Benefit: Process without using electricity.

Reheat food in the microwave using **Vent 'N Serve[™]** containers.

Added Benefit: Save time, space and money by freezing, refrigerating, and reheating leftovers and pre-prepared meals—all in one container.

Reduce packaging waste.

Buy staples in bulk and store in **Modular Mates[®]** and **Freezer Mates[®]** containers.

Added Benefit: Organize your pantry and freezer and save money by purchasing bulk quantities and keeping food fresher longer in the pantry or freezer.

Reduce the use of disposable storage containers when packing on-the-go meals or taking home restaurant leftovers.

Bring collapsible **FlatOut![®]** containers to store restaurant leftovers—they fit easily in a purse or bag—and take meals on the go in our lunch sets.

Added Benefit: Our products have a limited lifetime warranty, saving you the cost of disposable containers.

Environmental Challenge

Sustainable Tupperware Solution

Reduce consumption of disposable plastic wrap and food storage bags.

Shop with reusable **Tupperware® Eco Fashion Bags**.

Store your leftover food in a Tupperware® refrigerator container, such as a **Stuffables®** or a **Modular Bowl**.

Pack your sandwiches in a Tupperware® **Sandwich Keeper** to take on the go.

Added Benefit: Save money by reusing our durable, versatile storage containers. Because they have a limited lifetime warranty, you won't have to pay for new ones along the way.

Reduce food waste that ends up in landfills and encourage the consumption of locally-grown, organic foods.

Store fresh produce in **FridgeSmart®** containers. Their innovative venting system helps keep fruits and vegetables fresher longer by allowing them to "breathe."

Added Benefit: Organize your refrigerator and save on food bills by reducing the spoilage of produce.

Reduce the use of non-biodegradable foam and disposable cups.

Enjoy hot or cold beverages at home and on the go using the **Insulated Tumbler** and **Commuter Mug**.

Added Benefit: Save money on every coffee shop purchase by bringing your Commuter Mug.

Reduce the use of environmentally hazardous cleaning products and paper towels.

Clean, wash and dust with **Microfiber** products using little or no water and requiring little or no cleaning agent.

Added Benefit: Save time and money by eliminating cleaning products and paper towels from your shopping list.

Reduce paper and cardboard waste, cut methane emissions, improve soil, and promote biodiversity by composting.

Use the **Access Mates® Large Container** for temporary storage of compost items. To absorb methane and keep your kitchen odor-free, just add crumpled newspaper or cardboard from our shipping boxes to your compost bin.

Added Benefit: Save money on chemical products by making your own free, nutrient-rich fertilizer.

Reduce plastic waste.

Did you know?
Recycling one ton of plastic will save 600 – 800 kg of crude oil.

Tupperware® products are today's ideal solution for reducing plastic waste, because they don't need to be recycled—they're made to last a lifetime!

And, if you ever need to part with your Tupperware® products, return them rather than throwing them away.

Added Benefit: Tupperware will replace any product that chips, cracks, breaks or peels under normal, non-commercial use for the lifetime of the product.
